Company Overview

Nokomis Energy is a Minnesota based energy developer with a mission to accelerate local energy adoption through equitable partnerships. Our approach is predicated on creating value for all stakeholders involved in a project. We specialize in understanding the full development process from origination, to technology, to long-term operation.

Our Local Projects

Nokomis Energy has developed and constructed 2 gardens in Sibley county already. One in Green Isle and one in Gaylord. We also worked with the city and funded a LED lighting upgrade for Green Isle Community School. Next summer we’re adding another garden in Gaylord and are asking residents and businesses of Green Isle to participate.
